# State of Work Agreement

By: R-AI

For: Apartmentos 4 U LTD

09/02/2023

**Introduction:**

This SOW agreement was written on 09/02/2023 by R-AI LTD. If agreed upon, R-AI will develop a product for Apartmentos 4 U LTD. The product will consist of a software system that will have the ability to predict prices of house sales with certain qualities with a Graphical user interface. The end product should be a working coded functional software system.

**Deliverables**:

The project will deliver a software with GUI interface in which the machine learning model used in the software will be trained on the data provided by Apartmentos 4 U LTD that contains prices of house sales in certain areas. The software then should be able to give back the predicted price when submitting a certain zip code, house size, number of bedrooms, number of bathrooms, and lot size. R-AI will create the GUI interface, the development of the machine learning model, the design and development of the software, and error checking. The product will cover everything needed for the end product to be 100% complete and working properly. Meetings with the client will be scheduled every 3 weeks to discuss further steps and insights of the current situations/ state. If the client wants any additional developments that we see possible, we will develop them further. Additional developments will cost the client additional fees, depending on the development and time needed to complete the additional features/ development but an estimated >= 100 Euros.

**Maintenance**:

R-AI will be responsible for any maintenance regarding the project. Any issues, bugs, or errors will be our responsibility to fix within a period. If any issues or bugs are reported after 6 months after the product has been completed and sold to the client, then it will not be R-AI responsibility to fix them. Fixing bugs after the 6 months will cost additional fees of >= 100 Euros. Fixing the bugs won't take more than 1 week to fix, depending on the issue. And if it

requires more than 1 week or more than the agreed maintenance period, the client will be notified beforehand and will receive compensation.

### Time estimates:

The steps to complete the project are Planning/ gathering requirements/ brainstorming, Designing, Developing, Testing, Deployment, Maintenance, and Release. Because of the steps needed to complete this project, The project duration is approximately 3 months, be ready by the end of April. If the project wasn't ready by then, then the client could either agree to a new time or can withdraw from the project if possible.

### Cost estimates:

The project will be charged by the project. The estimated cost of the project is 4200 euros. The total payment of the project will be divided into 3 phases. After each meet with the client, the client will pay 1/3 of the total cost to insure fairness and approval of the current state. If the payments is not paid after the meet then no further development will be done. As mentioned before, any additional features outside the agreement may cost the client more money with a value of >= 100 (depending on the features), and any maintenance after 6 months from selling and finalizing the product will cost the client a value of >=100 Euros.

### Acceptance:

The listed the product criteria in which the product would be ready:

- A software with a complete GUI interface
- Trained machine learning model
- upload able CSV file for creating a model for house price estimation.
- An accurate price prediction model
- The software should do basic error checking.
- Software design

Authorizing the criteria will be our product owner or manager. The product owner would go through the product multiple times to ensure that the criteria have been reached and that the product is ready to be finalized. the product owner would also include the developer in the process to get a clear insight into what the product is and get a better understanding through the eyes of the developer. The client will also have the opportunity to test out the software as many times wanted and give the stamp of approval before finalizing the product.
